THE GRAMOPHONE.

AS AN ADVERTISING MEDIUM.

Parties desiring to advertise their wares will find in the Gramophone a most valuable medium.

We will make for you any special plate, containing, besides an interesting musical piece, etc., a bit of advertising such as you may suggest; manufacture as many hard rubber copies as you may order at regular wholesale rates; and distribute them gratis to people buying Gramophones.

Prices for the original plate for advertising purposes will vary according to the special expenses incurred in making it, the talent to be employed, preparations, etc.

When less than 1000 copies are ordered the expense for making the matrix or press form (about \$10,) will be added.

Nobody will refuse to listen to a fine song or concert piece, or an oration—even if interrupted by the modest remark: **"Tartar's Baking Powder is the Best,"** or **"Wash the Baby with Orange Soap,"** etc.

The Gramophone

Invented by

E. Berliner

It actually "Etches the Human Voice"

A 7-inch disc will contain a two-minute letter in the speaker's own voice, and it may be mailed to friends all over the earth in a large envelope for a few cents postage.

Collections of these Phonautograms will become very valuable, and whole evenings may be spent at home in going through a long list of interesting performances.

Foreign languages and elocution will eventually be taught by the Gramophone with perfect facility.

A singer unable to appear at a concert may forward his or her voice and so be represented as per programme, and Conventions may listen to sympathizers, be they distant thousands of miles.

Etched records can be printed, and from such prints other etched plates, sounding precisely like the original, may be produced at will by the photo-engraving process.

Future generations will be able to condense into the brief space of twenty minutes the tone pictures of a lifetime—five minutes of childish prattle, five of boyish exultation, five of the man's mature reflections, ending with five moments embalming the last feeble utterances from the death-bed. Will this not seem like holding veritable communion with immortality?

From what has been stated it will be seen that the BERLINER GRAMOPHONE is to the voice what photography is to the features—*i. e.*, a simple, practical medium for securing accurate and lasting records.

IAN COLQUHOUN has generously sung for us Sir A. SULLIVAN'S Musical Setting of RUDYARD KIPLING'S Celebrated Poem. IT IS CLEAR, LOUD, AND DISTINCTLY ENUNCIATED. The song required two discs for the reproduction, and is sold in complete sets only. The total receipts from the sale of these records at the full price, 5s., are to be forwarded by us to the "Daily Mail" War Fund. We fill all orders for these records through our Agents only. We will in all cases direct purchasers to our nearest Local Agent. Our Agents will all act for us in this matter from purely patriotic feeling.

NOTHING SUCCESSFUL LIKE A GOOD COPY

Did you ever know an article to succeed that did not possess great merit? The "Gramophone" has proved the adage, and is pleasing multitudes of people in every country and in every language on the globe. We are distributing every 3,000,000 Gramophone Records in English, French, Russian, Italian, Spanish, Swedish, Turkish, Hindoo, Urdu (Indian dialects), Japanese and many other languages. We have established our own selling houses at Amsterdam, Brussels, Berlin, Barcelona, Buenos Ayres, Calcutta, Milan, Naples, Paris, St. Petersburg, Sydney, and Vienna. The FOUNDATION of our business is the violin, cornet, clarionette, flute, each and every instrument of the orchestra—even The Orchestra itself—the piano, mandolin, guitar, zither, concertina, and last, but not least, the HUMAN VOICE.

Is there any limit to our field? New music, new songs, new artists, make our catalogue always growing.

WE MAY SAY "OUR WORK IS NEVER DONE."

AN ACCIDENT

happened some time since in our laboratory. It was one of those peculiar accidents which have often occurred during the course of scientific work and research, which uncover to the diligent student some possibility beyond his expectation or even dream. An expert brought us a record plate which he called a "treasure". He said—"I was making a record on a blank disc, and when I finished it I tried it as usual, and to my surprise I discovered I had two distinct records on the same disc—once a famous solo and once another. I think so." "Have you found out how it happened?" "Yes, the disc or plain record plate had on it the Cornet Solo made at a previous session without my knowing it." Now it has both and each clear and separate, and you can have either selection you prefer. "Can you do it again?" "I think so." We have working for months to perfect this discovery. SO WONDERFUL is it that we wish to place it in the hands of everybody in the United Kingdom. The latest result has THREE SEPARATE and DISTINCT records on everybody in the United Kingdom. We call it the Puzzle Plate because you cannot tell which selection you will produce when you put the same plate—1. A Piano Solo; 2. A Humorous Talking Selection; 3. A Song, "The Way to Kiss a Girl." We call it the Puzzle Plate because of the record. Each sound wave extends from the beginning to the end of the reproducing Stylus needle on the record. Near you on which you can try it, and in any event all dealers in Gramophones will allow you to try it on one of their machines—and Gramophone dealers are everywhere. We are going to give this plate away. The conditions are below the Puzzle.

'His Master's Voice' Records

Hear this delightful fairy music on 'His Master's Voice'—the Records of Perfect Tonal Purity—at your dealer's

THE spirit of Algernon Blackwood's fairy play, caught to perfection by Sir Edward Elgar, permeates every note of this "Starlight Express" music, and the rendition of it in no way falls short. Mme. Agnes Nicholls and Mr. Charles Mott give of their best in the records listed. Mr. Mott created the rôle of the Organ-grinder at the recent Kingsway Theatre production. All the records are with an orchestral accompaniment of wistful beauty, personally conducted by Sir Edward Elgar, who is a warm admirer of 'His Master's Voice'

Fred Gaisberg with Peter Dawson comparing Berliner's gramophone with the latest EMI radiogram, 1948

In the early 1900s, the only way music lovers could hear Melba or Caruso sing was to attend one of their concerts. The advent of the gramophone went a long way to changing that, but it was the industry of Fred Gaisberg which revolutionised the face of music forever.

Gaisberg seized upon the opportunities offered by Emile Berliner's flat-disk talking machine and set off to capture the sounds the public wanted to hear. Where there were singers, there was Gaisberg. Russia, India, China, Japan and Burma all played

host to the amazing Gaisberg and his travelling studio as he pursued the latest local talent, often at great personal and financial risk, and even against his employers' wishes.

Gaisberg's ability to recognise new talent saw him establish worldwide careers for some of the most remarkable artists in musical history – Menuhin, Novello, Barbirolli, Bruno Walter, Hess, Lehmann, Rubinstein, Michelangeli, Britten and Pears. But it was by attracting the major names of the day to record for him – among them Caruso, Melba, Tetrazzini, Chaliapin, Paderewski, Kreisler, Casals and Elgar – that the fledgling record industry's potential began to be recognised.

With the music business currently one of the world's healthiest industries, Gaisberg's legacy – notably the ongoing success of EMI records and Abbey Road studios – lives on. Illustrated by more than 200 rare photographs, **Sound Revolutions** is an account of not only one man's life, but also of musical history in the making.
